

Parent Case Study

How Fiona and her son have been using Pocket Posters to structure their home-based learning.

Background

Fiona is a busy business owner and parent to two Children, 1 with ADD and Autism. Her son has recently completed his GCSEs.

Problem

Fiona's son had been diagnosed with ADD and autism. His neurodiversity meant he struggled to take consistent, detailed notes during lessons, so revising for his GCSEs became a daunting task as he didn't have very good notes to revise from. He also found dealing with large amounts of information overwhelming and struggled having to spend long periods of time focusing on his revision.

Fiona also found that as a busy working parent it was difficult to keep up with the syllabus and didn't feel confident to teach him things as she had learned them as the teaching methods had changed since she was at school.

Solution

Fiona purchased a suite of Pocket Poster Revision Guides in all GCSE subjects relevant to her son.

The bright colours, graphics and condensed information made these guides particularly useful for her son. The fact that all the relevant information was presented in a clear and concise manner made it easy to understand and helped Fiona's son to remember key points quickly.

They also helped to refresh Fiona's memory on the subjects and acted as a prompt to find more detailed information online if she needed it.

Fiona found the digital versions of these guides to be particularly helpful. Her son was able to use the digital tests to track progress quickly and easily online. Furthermore, he could access them anytime and anywhere, which allowed him to revise even when they were away visiting family.

Outcome

Here's what Fiona had to say:

'As a busy business owner and parent, I would highly recommend guides to anyone looking for a comprehensive revision guide! They are excellent value for money: you get a great deal of information for your money.

The material is easy to understand, and the explanations are clear. It is also very helpful that the subjects are broken down into smaller sections which makes it easier to focus on specific areas.

These revision guides provided structure and guidance to help my son as well as providing large amounts of information in an organised way. They also gave him the opportunity to review and revise material in his own time, meaning he gained confidence in his ability to learn and understand.'
